SELF-GUIDED AIRPORT TOUR

INDEED! IT'S HERE.

NEW AIRPORT | NEW ADDRESS | NEW EXPERIENCE → → →

Art glass by Martin Donlin

IND is the official airport abbreviation used by the FAA and the airlines. Although it will not be installed or available for public viewing during Community Days, a large light-based sculpture with six forms creating the letters “IND” will be placed on a seven-acre area near the entrance. This ever-changing light display will welcome all who visit the airport. Collectively, these six pieces are 100 feet wide. Each is 28 ft. tall and 8 ft. deep.

Parking is a breeze at INDI! There is no need to use a commercial parking service at the new airport. The Parking Garage, Economy Parking, and Long-Term Parking areas are spacious and easy to use. Shuttles will take you from Economy Parking and Long-Term Parking to and from the terminal. The garage includes numerous walk-and-pay stations that accept both cash and credit cards. In fact, you can exit the garage or any parking lot with a credit card or pay cash at a cashier booth.

Passengers on **international flights** will no longer arrive at the International Arrivals Building on Pierson Drive. Instead, they will arrive at 7800 Col. H. Weir Cook Memorial Drive where they will go through U.S. Customs and claim their baggage before exiting the airport.

Want to shop on Concourse A but your gate is on Concourse B? No problem! Once you have cleared security, all ticketed passengers can easily move between Concourse A and B without having to be rescreened.

Maximum accessibility, mobility, safety, and convenience for all passengers has been integrated throughout the terminal. Numerous features throughout the terminal provide passengers of all ages and abilities with greater comfort and an improved airport experience.

The Glory of Sports In Indianapolis by Tom Torlueme

The terminal features **original art** created to evoke thoughts about flight, flying, nature, the seasons, sports, and characteristics reflective of the city and state. Many pieces were commissioned from Hoosier natives and those with strong ties to Indiana, including poets whose work is featured on several of the art glass walls. A variety of materials and mediums are utilized, including Indiana limestone, hand-painted mosaic tiles, and terrazzo flooring.

The airport features more than 50 fine dining and quick-service restaurants, news and gift shops, and other retail **shopping and dining** options. Passengers can get a real taste of Indianapolis at Harry & Izzy’s, Shapiro’s Delicatessen, King David Dogs, Café Patatchou, and the Indianapolis 500 Grill, among others.

Passengers can get a real taste of Indianapolis at Harry & Izzy’s, Shapiro’s Delicatessen, King David Dogs, Café Patatchou, and the Indianapolis 500 Grill, among others.

The **Civic Plaza** skylight is 200 ft. in diameter, which is the same size as the historic West Baden Springs Hotel in French Lick, Indiana. Under the flooring

in Civic Plaza is an energy-efficient radiant heating and cooling system.

Self-Guided Tour Route → → →

- From the Ticketing Hall, step outside to the **Departures Level drive** and take a short stroll down the sidewalk. This is where passengers can be dropped-off for departing flights at one of 16 curbside check-in stations.
- Re-enter the terminal and explore the **Ticketing Hall**, which features four "islands" where you can purchase tickets, obtain boarding passes, and check luggage.
- Note our **Guest Services Center**, where you can get information about airport services and amenities; send and receive faxes; page passengers; have documents copied, printed, or notarized; get brochures about local attractions; ask questions; and receive other assistance.
- Just past Guest Services, you'll enter **Civic Plaza**. This light-filled area is where you can meet or spend time with arriving and departing passengers. Want to bring the family to the airport for a snack and to watch the planes? No ticket is needed to enjoy Civic Plaza! And on a clear day you can see the downtown Indy skyline.
- Follow signs toward the lower **Arrivals Level**. Also known as baggage claim, this is where bags unloaded from planes are delivered to arriving passengers. Note each of the six baggage carousels has an overhead monitor which will display the airline and flight number so passengers can easily find their luggage quickly.
- On the south end of the Arrivals Level, look through the glass wall at the landscaped **Garden** which features a unique sculpture made from an actual F-14 "Tomcat" aircraft wing. There is a similar landscaped garden area on the north end of the Arrivals Level.
- From the baggage claim area, move toward the small set of stairs across from the grand staircase. Go up the stairs or use the nearby elevator to the **Pedestrian Bridge**. This enclosed walkway connects the terminal to the Parking Garage. It features moving sidewalks and a unique piece of interactive art that "follows" passengers as they cross the bridge.
- The bridge will lead you into the third floor of the **Parking Garage** and it's light-filled center atrium featuring a piece of suspended art. Note the spacious garage parking area. Each level of the garage is the equivalent of 11 acres! It is three times the size of the garage at the old airport. Eight rental car operations and the Ground Transportation Center (where information about limousine, shuttle bus, hotel courtesy vehicle, and other transportation services like IndyGo can be obtained) are located on the first floor of the garage. This is the end of your self-guided tour. Thank you for attending!
